

BHUMIKA PORWAL

Technical Product Manager | Aviation Technology | Flight & Ground Operations | Agile Delivery | Product & Program Management | SAFe 6.0 | PMP

Dubai, UAE | UAE Resident | +971 521027630 | bhumika.porwal92@gmail.com | [Linkedin/bhumika-porwal](https://www.linkedin.com/in/bhumika-porwal)

PROFESSIONAL SUMMARY

Technical Product manager with 12+ years of IT experience leading cross-functional teams in Aviation, Telecom and Banking domains, including current, hands-on experience managing enterprise technology products at Etihad Airways. Skilled at requirements gathering, backlog management, Agile delivery, and stakeholder management, with strong technical grounding to bridge business and engineering. Proven track record delivering large-scale, multi-million-dollar transformation programs in regulated environments, including change and release governance, compliance checkpoints, deployment readiness assessments, and executive-level reporting to leadership and steering committees.

CORE SKILLS & COMPETENCIES

Product & Delivery Management: Product Backlog Management, Requirement Gathering (BRD/FRD), User Stories, Product Roadmaps, Acceptance Criteria, Agile/Scrum/SAFe Delivery, Release & Deployment Management, Project & Program Lifecycle Management, Risk & Dependency Management

Governance, Risk & Compliance: Corporate Governance, Change Management, Regulatory Compliance (CBUAE, AML/KYC, PCI-DSS), Change Advisory Board (CAB) Support, Steering Committee & Executive Reporting, ITSM/ITIL-aligned Incident & Release Management, Environment Management (Dev/SIT/UAT)

Stakeholder & Team Leadership: Cross-Functional Stakeholder Management, Liaison with DevOps, Data Engineering & Network Security teams, Vendor Management / third-party vendors, Mentoring & Team Leadership, RFPs & SOW

Technology & Architecture Exposure: Cloud Platforms (AWS, Azure), Microservices, REST APIs, MongoDB, PostgreSQL, LLM/Generative AI, Java, DevOps (CI/CD, AWS, Azure, Kubernetes, Terraform), LangGraph/LangChain

Tools: Jira, Azure DevOps, Confluence, Power BI, Tableau, Rally, Smartsheet, Grafana, SonarQube, Prometheus, MS Office Suite

Certifications: PMP, SAFe Advanced Scrum Master (SASM 6.0), Oracle certified Java Developer, AI for Leadership & Management

AI/ML Exposure: Fraud Detection, Credit Risk Scoring, AI Governance, Responsible AI, MCP, Prompt Engineering, Gen AI.

PROFESSIONAL EXPERIENCE

Scrum Master

March 2026 – Present

[Etihad Airways](#) | [Xebia Software LLC](#) · Abu Dhabi, UAE

Project: Etihad Airways – Connected Operations · **Designation:** Principal Consultant · April 2026 - Present

Skills & Tool Stack: Confluence, Jira, Business Transformation Strategist, Project Lifecycle management

- Led end-to-end planning, execution, and delivery of aviation technology projects across Flight Operations and Crew Management domains, managing scope, dependencies, and risk across Product Owners, engineering, security, infrastructure, and business stakeholders.
- Owned project delivery for SkyPad, SkyPort, and Catering platforms — technology products integrating with AMOS, Amadeus, and iFlight Neo — coordinating cross-functional teams to deliver on time while maintaining operational continuity.
- Directed program-level planning and dependency management across the Agile Release Train (ART), driving sprint planning, PI Planning, ART Sync, Big System Demo, and Inspect & Adapt sessions to keep multi-team delivery aligned to project milestones and business priorities.
- Managed project scope and delivery roadmap with Product Owners and engineering teams, tracking progress, burndown, and velocity metrics via Jira dashboards to proactively identify and mitigate delivery risks.
- Prepared and presented change records, release plans, project status, and deployment readiness assessments to the Change Advisory Board (CAB) and leadership, governing software releases through Etihad's Route to LIVE (RTL) process in compliance with corporate governance and cybersecurity policy.
- Managed project risk, technical dependencies, and delivery roadblocks in a regulated enterprise environment — resolving blockers, coordinating deployment readiness, and ensuring compliance with aviation regulatory frameworks (GCAA/FAA/EASA).

Scrum Master + Project Manager | AI in FinTech

June 2023 – Oct 2025

[Synchron](#), [Emirates NBD](#) · Dubai, UAE

Product: Fraud Detection & Incident Tracking Tool · **Designation:** Lead Technology · Jun 2023-Oct 2025

Skills & Tool Stack: Confluence, Jira, Agentic AI, MLOps, MCP server, Predictive Modelling, Business Transformation Strategist, Generative AI, Project Lifecycle management

- Leader transitioning from high-scale financial services to customer-facing operations, bringing expertise in secure, compliant, business analysis and highly available systems management to enhance operational efficiency and customer experience.
- Established **AI governance frameworks**, steering committees, reporting cadence, and compliance checkpoints covering data readiness, model validation, regulatory approvals, and production rollout.
- Defined product vision for Generative AI features (LLM-powered fraud insights, customer sentiment analysis) leveraging prompt engineering & Agentic AI frameworks.
- Proven experience delivering **end-to-end AI/ML programs across ideation**, model development, pilot, production rollout, and enterprise-wide business adoption within regulated banking environments.
- Defined requirements for **AML fraud detection and credit risk (CBUAE) scoring initiatives**.
- Partnered with AI/ML engineers to validate fraud detection model outputs, reducing false positives by 15%.
- Managed product backlog in **Jira/Azure DevOps**, aligning features to business and compliance priorities.
- Delivered multi-currency FCY transactions, boosting FX conversions by **28%** and deposits by **22%** till Go-Live.
- Coordinated UAT cycles to ensure compliance with regulatory standards in all environments (Dev/UAT/SIT).
- Facilitated enterprise Agile ceremonies including **PI Planning, Sprint Planning, Backlog Refinement, Daily Standups, Sprint Reviews, and Retrospectives** across multi-team delivery, improving velocity by 35%.
- Led AI delivery through **GenAI integration**, aligned with **strengthened IT governance, DevOps pipelines, MLOps practices**, and regulatory compliance standards.
- Led CI/CD and cloud migration programs, cutting costs by \$250K annually.
- Mentored junior engineers and improved Agile velocity by 35%

Technical Delivery Professional

May2018 – May 2023

BT e-serv Pvt Ltd · Bengaluru, India

Product: Openreach Portal · May 2018-May 2023

Skills & Tool Stack: Agile frameworks (Scrum, SAFe), Jira, Tableau, OSS, BSS, VoIP, Backlog Refinement, Stakeholder Management, IT Ops Leader with Multi-Location Project Management, Multi-million, multi-year program

- Managed end-to-end delivery for OpenReach Developer & Supplier Portal in Utilities Domain with full responsibility for budgeting, planning, and vendor management. These portals are responsible for order creation, order management, submitting orders, user interface for different plans, discount management, raising issues and entire journey of order till it is successfully delivered. This includes selection of subscription packages, discounts etc.
- Have delivered services which help to achieve targets for both customers facing systems and Businesses i.e. B2B and B2C.
- Improved Agile Maturity for 2 portals end to end, from Level 1 to Level 4 (95% +agile).
- Transitioned from Waterfall to Agile, delivering **8 major and 14 minor releases in 2 years**.
- Directed DevOps strategy across 12 portals, **saving £203,800** annually through automation and efficiency.
- Governed ERP-integrated enterprise platforms involving billing, customer systems, data migration, integrations, and UAT across multiple vendors.
- Acted as Scrum Master for a team of 7, improving stakeholder engagement, and overseeing and mentoring team members, coordinating work, and ensuring successful project deliveries in cross-functional team environment.
- Led end-to-end API development whereas from Business perspective, I have done designing, **requirement gathering, implementing, and testing the microservices, code reviews, sprint planning, applications demos** and supporting teams in Go live with automation.

Software Consultant

Aug 2016 – May 2018

Genpact Headstrong · Bengaluru, India

Product: GE Healthcare: PMR & CMR · **Designation:** Consultant · Aug 2016-Nov 2017

Skills & Tool Stack: Java/J2EE, Predix, Spring Boot, Spring JDBC, RESTful Web services, Maven, Mockito, CF CLI, Predix Cloud, AWS, PostgreSQL, JSON and J2EE, SOLID Principles, Design Patterns, Agile methodologies.

- Independently designed and developed two enterprise tools (PMR & CMR), enabling contract cost optimization, operational excellence, and project margin review across multiple regions and business verticals.
- Built microservices for business cost analysis, pricing validation, and engineering data collection (ITO baseline, actuals, estimates, project risks), improving decision-making for project managers.
- Configured and deployed applications on local servers and migrated them to Predix/AWS Cloud, ensuring scalability and high availability.
- Reduced project cost review cycle time by 20% by automating SAP data integration and cost analysis workflows, improving contract margin visibility, and boosting profitability.

Product: Goldman Sachs: FD & RM · Nov 2017-May 2018

- Contributed to the Fraud Detection & Risk Management platform by implementing PCI-DSS-compliant services, safeguarding high-value financial transactions.
- Developed and maintained monitoring services for Dow Jones defaulters list, enabling early detection of suspicious profiles and reducing fraud risk.

- Executed KYC re-verification workflows to validate customer authenticity, strengthening regulatory compliance and preventing financial crimes.

System Engineer

Jan 2014 – Jul 2014

IBM India · Bengaluru, India

Product: AT&T: Service Provisioning Platform (SPP)

Skills & Tool Stack: Java/J2EE, Junit, Spring Boot, Microservices, Rest APIs.

- Developed and enhanced the Service Provisioning Platform (SPP), a suite of applications supporting provisioning of AT&T Voice and Enhanced services.
- Delivered full SDLC (design → testing → deployment) using Spring Boot and REST APIs, reducing release cycles by 25%
- Reduced production defects by half through proactive bug analysis, code reviews, and robust unit testing.
- Collaborated with QA teams and cross-functional stakeholders to ensure seamless releases and high system reliability.
- Actively participated in Agile ceremonies, estimations, walkthroughs, and reviews, contributing to predictable and on-time delivery.

EDUCATION

B.E., Computer Science – MIT, Mandasaur (2013)

CERTIFICATIONS & AWARDS

- ❖ PMI ACP certified PMP professional
- ❖ Certified AI Empowered SAFe Advanced Scrum Master (SASM 6.0) from SAFe
- ❖ Agile Project Management Practitioner | Agile & Scrum practices
- ❖ GenAI for Leaders: Master GenAI and tools
- ❖ Prompt Engineering
- ❖ Oracle Certified Java Programmer (OCJP)
- ❖ Predix Certified – GE Digital
- ❖ Spot Awards – IBM (2015) & Genpact (2017)
